EDUCATION

B.Tech in Computer Science and Engineering

Vellore Institute of Technology

2022 - 2026

CGPA: 8.68/10

XII-PCM (CBSE)

Gyan Ganga International Academy, Bhopal

2022

Percentage: 85.8%

X (CBSE)

St. Mary's Convent Sr. Sec. School, Bhopal

2020

Percentage: 95.2%

TECHNICAL SKILLS

Languages: Python, Java, Dart

Web: HTML, CSS, Flask

Database: MySQL, OracleDB

Tools/Frameworks: Android, Flutter, Git/GitHub, Scikit-Learn, NLP, Firebase, AWS

PROJECTS

CipherAuth | [LINK](#)

Flutter Developer, Security Engineer

March 2026

- Built a secure, cross-platform **TOTP** (Time-based One-Time Password) authenticator application using Flutter, delivering encrypted token management across Android and Windows with seamless performance and consistency.
- Implemented AES-GCM encrypted local storage secured by a master password, ensuring fully offline data protection and no cloud dependency; successfully published on **Microsoft Store** and **Google Play Store**.
- Integrated QR-based account provisioning, secure export/import functionality, real-time search, and peer-to-peer **encrypted device sync**, enabling secure multi-device credential management within the same network.

DocDispatch | [LINK](#)

Flutter Developer, Firebase Admin

January 2026

- Designed an Android healthcare platform enabling patients to report conditions via **OTP-based authentication** using Firebase, capable of handling 1M+ secure verifications monthly with robust reliability and low-latency.
- Constructed a scalable backend in **Java Springboot** for healthcare data segmentation, supporting retrieval of 1K+ registered patient records efficiently, enhancing system performance, accessibility and reliability.
- Devised state-specific dashboards for hospitals, streamlining appointments, prioritization, and resolution, reducing manual case allocation time by 50%, and improving healthcare delivery efficiency significantly.

Windows Password Autofill | [LINK](#)

Python Developer, System Tools Developer

December 2025

- Engineered a **Windows-native autofill utility** using Win32API and UIAutomation, implementing context-aware hotkey triggers to detect active windows and automate multi-field credential entry, reducing login latency.
- Architected a high-security storage layer utilizing AES-GCM authenticated encryption; integrated secure **hashing** to ensure cryptographic integrity and 100% protection of locally stored authentication secrets.
- Developed a robust **integrity-check suite** via custom Batch scripting that executes 5 key validations, including automated path detection and SHA fingerprint verification, ensuring environment consistency.

RELEVANT COURSEWORK

- DSA, Operating Systems, DBMS, Mobile Development, Computer Networks, OOPs, Parallel and Distributed Computing, Data Science, Cyber Security, Probability and Statistics, Web Development, AWS Practitioner

ACHIEVEMENTS

- Achieved a perfect score of 100/100 in the High Performing Coding Course in Data Science on iamNeo platform.
- Bagged SQL proficiency badge on LeetCode.

CERTIFICATIONS

- Data Science** - iamNeo
- Cyber Security Analyst** - IBM Career Education Program
- Cloud Computing** - IIT-KGP

PERSONAL DETAILS

Languages: Hindi, English

Interests: Cross Platform, Open Source, Cyber Security
